GymCoach

for the Speediance Gym Monster

Your own AI trainer. A plan that grows with you.

GymCoach reads your workouts from the Gym Monster, makes a personal plan every week that grows with your strength, and puts it on the machine with one click.

Screen preview with sample data

Personal weekly plan

Tailored to your goal, your days per week and the time you have.

Progress you can see

Weights go up automatically when you are ready.

Runs at your home

On your own server. Your data stays yours, even when you check it on the go.

WHAT GYMCOACH DOES

From your last set to your next plan, automatically.

Gym Monster
You train; sets, reps and weights are logged

→

Speediance cloud
Your full history, via your own account

→

GymCoach
Analyses, plans the next week and puts it back on the machine

Smart progression

Hit the maximum in all sets and the weight goes up; miss it twice and it drops 10%. Rest and volume adapt to you. A recovery week every six weeks.

Fits your week

Per day: strength, a cardio circuit on the Gym Monster, or walking and cycling outdoors. More arms or chest this week? Say so, and the plan puts the emphasis there — with a muscle map.

Warm-up and cool-down

A warm-up set at half strength, light cable exercises beforehand and stretches afterwards, matched to the muscles of the day.

AI coach of your choice

Let Claude or your own local model take a look. Every suggestion is checked against safe limits, and you decide what to accept.

One click to the machine

Check first, then send: the programme is ready on your Gym Monster. What you already did this week is ticked off in your plan.

Scale and Apple Health

Weight, fat % and muscle mass per arm, leg and trunk from Withings. With the iPhone app GymCoach Sync: activities, steps and heart rate.

HOW A WEEK GOES

1 · Plan
New proposal based on last week

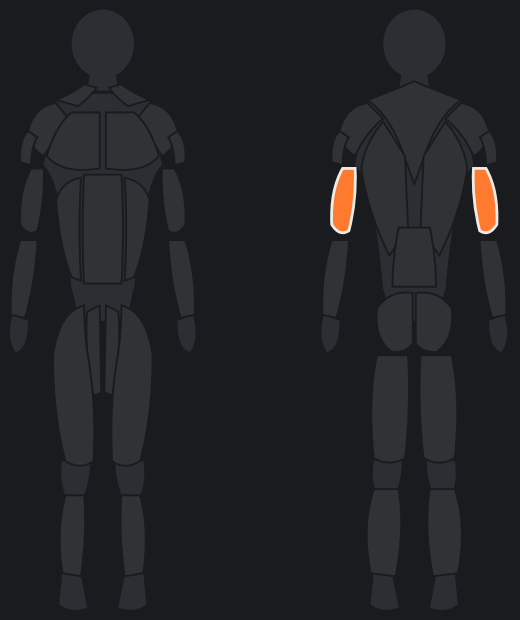

2 · Train
Programme ready on the Gym Monster

3 · Sync
Sets in, summary by email

4 · Grow
Weights adapt to your progress

YOUR WEEKLY PLAN

Say what you want to focus on this week. See right away what you train.

THIS WEEK

Arms · Chest · Shoulders

"Next week I want to focus more on arms, chest and shoulders."

SETS PER MUSCLE GROUP

Triceps	12
Front shoulder	9
Biceps	9
Rear shoulder	9
Chest	6
Back (lats)	6

Triceps: 12 sets this week
Full Body A · Tricep Rope Pushdown (2 sets)
Full Body A · Bench Press (3 sets, secondary)
Full Body B · Overhead Extension (2 sets) · …

Full Body A

~44 min · 8 exercises

Warm-up	4 ex. · ~6 min
Dual-Handle Bench Press	3 × 10 · 9 kg
Neutral-Grip Shoulder Press	2 × 10 · 5.5 kg
Seated Lateral Raise	2 × 12 · 2.5 kg ↑
Dual-Handle Biceps Curl	2 × 12 · 5.5 kg
Tricep Rope Pushdown	2 × 12 · 7 kg ↑
Handle Goblet Squat	2 × 12 · 15 kg
Cool-down	3 stretches · ~4 min

Check · **Put on Gym Monster**

FULL BODY A · CHEST PRESS · FOCUS

Dual-Handle Bench Press

Chest · Shoulder · Triceps

Advice: same weight, +1 rep
Last time: 11/11/11 × 9 kg
Warm-up set: 8 × 4.5 kg

Sets	Reps	kg	Rest
3	12	9	60

Swap exercise · **Done**

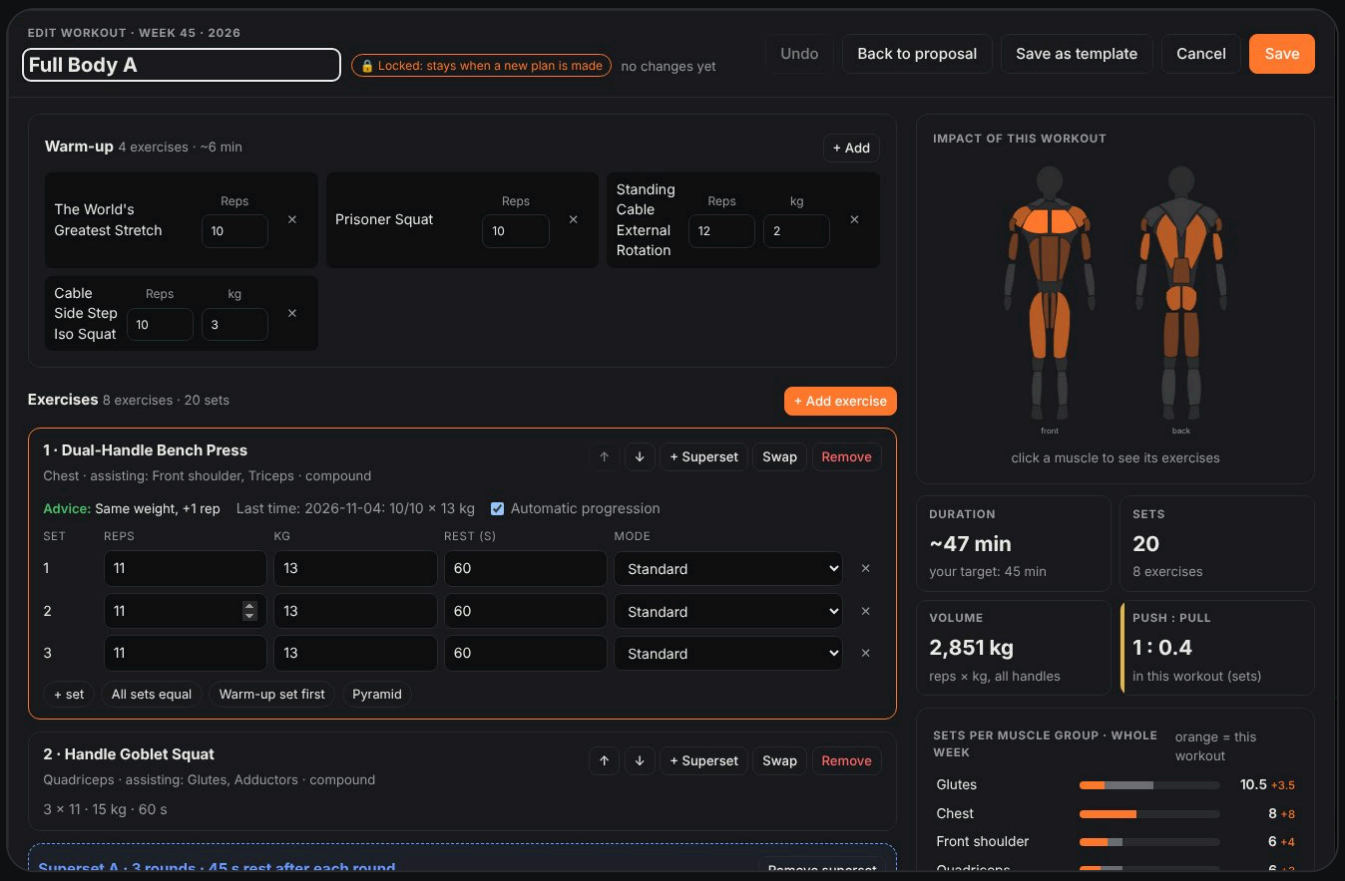

Click a muscle group and the figure highlights that muscle — and in every workout the exercises that hit it light up.

Click an exercise for all details, your last performance and to adjust sets, reps or weight.

BUILD YOUR OWN

Adjust every proposal. Or build your own workout.

Edit a workout from the plan, start empty, copy one or pick a template. The figure and the sets per muscle group for the whole week update instantly.

Everything per set

Reps, weight, rest and the Gym Monster mode: standard, eccentric, isokinetic, constant or spotter. Pyramid and warm-up set in one click.

Supersets

Two or more exercises alternated, with no rest in between. On the machine they appear as alternating steps, with rest after each round.

Browse exercises

Browse by muscle group and type, with video, key points and instructions. Fetched once and kept on your own server for everyone.

Locked, yet moving forward

An edited workout stays when a new plan is made. The weights grow with your progression, except where you choose a fixed weight.

Share templates

Save a workout as a template and share it with the other users on your server. Everyone gets weights from their own history.

AI coach looks along

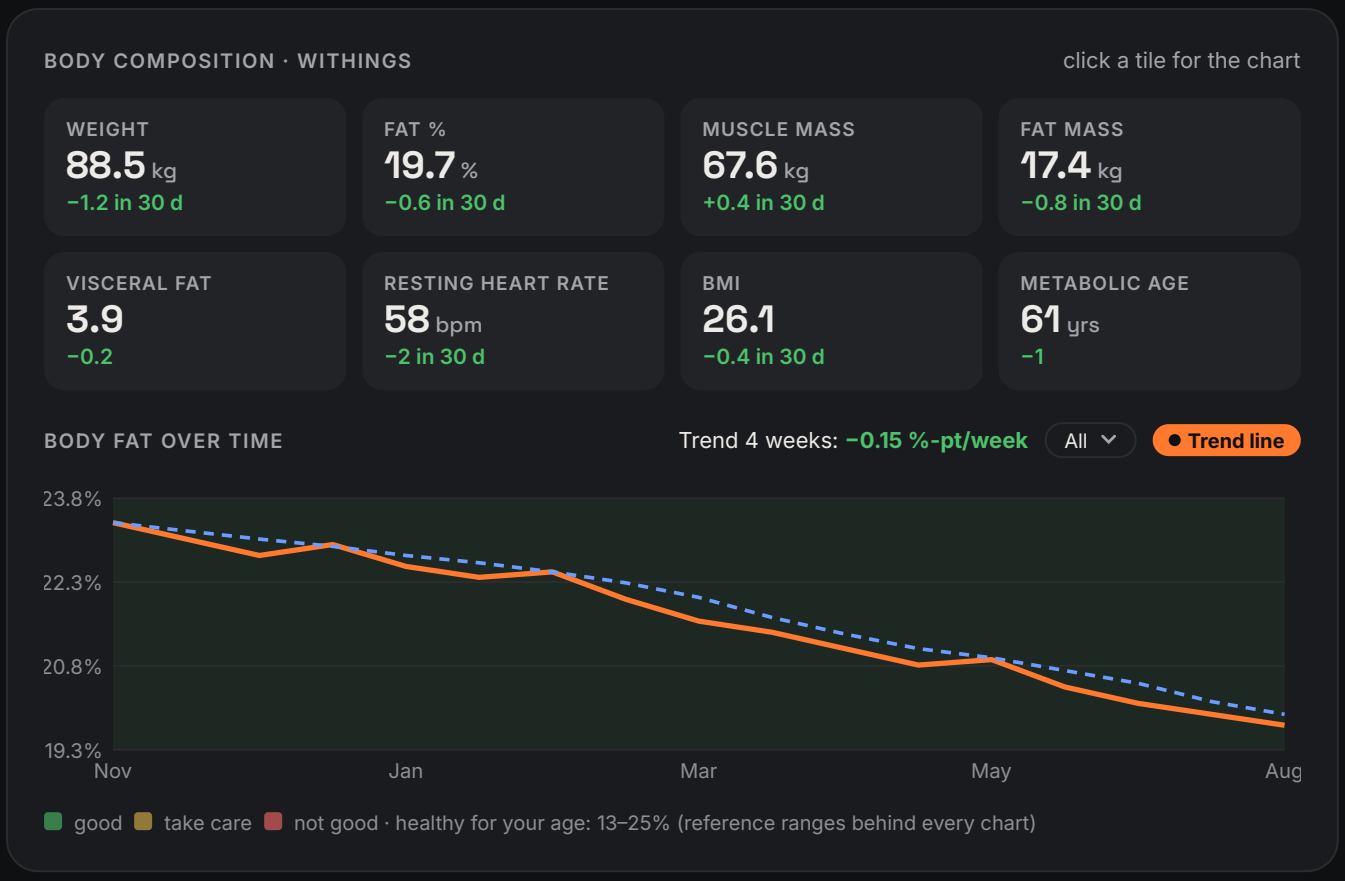

Also on your own workouts. The structure stays; every suggestion has a reason and you tick what you accept.

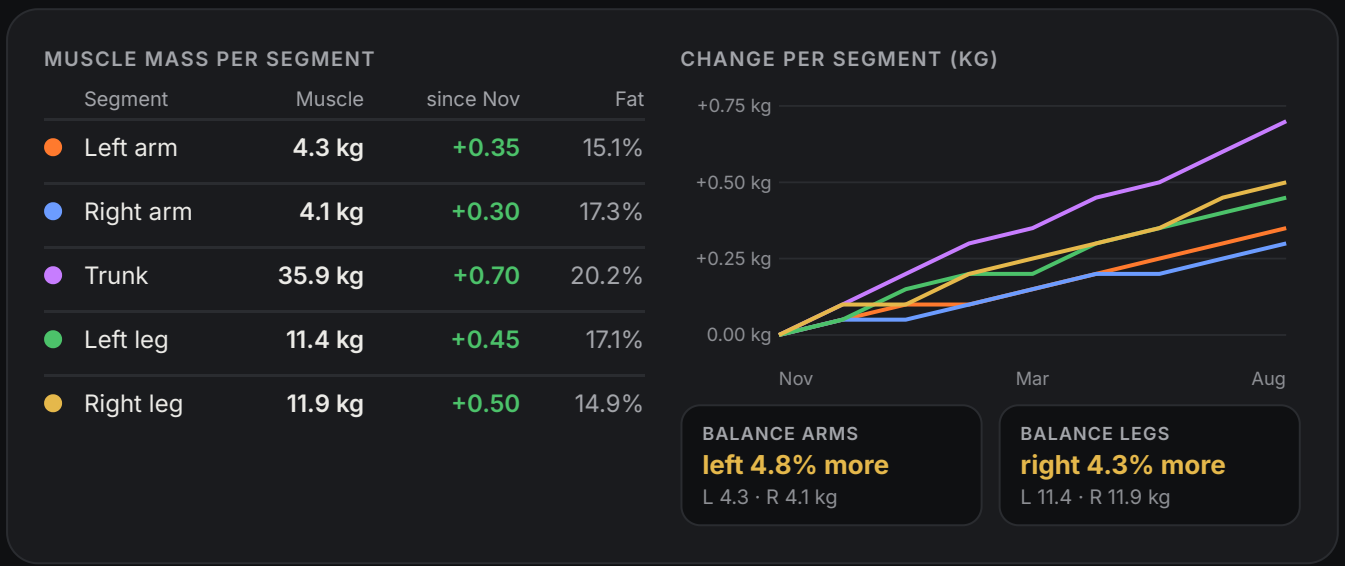

You build the warm-up and cool-down the same way. Everything goes to the Gym Monster in one click.

BODY MEASUREMENTS

See what your training does to your body.

Step on your Withings scale and GymCoach fetches everything automatically: from weight, fat % and BMI to muscle mass per arm, leg and trunk and your resting heart rate. With reference ranges, so you see what is good.

Automatic
New measurements come in by themselves, plus your full history.

Trend and period
Trend line on or off; period from this week to everything.

Per person
Every user connects their own Withings account.

INSIGHT

For those who love numbers.

Every set counts. See per muscle group, per exercise and per workout how you grow, whether your training is balanced and how you recover — over a week, this year or your whole history.

12 KEY FIGURES · FROM THIS WEEK TO YOUR WHOLE HISTORY

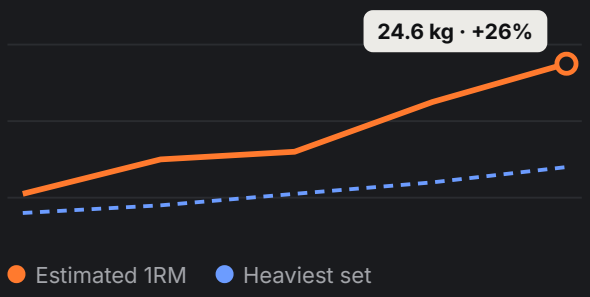

This year

WORKOUTS	WEEK STREAK	RECORDS	VOLUME	SETS/WORKOUT	FAVOURITE DAY
118	12 wk	31	186 t	14.2	Mon
avg. 2.8 per week	longest: 16 weeks	new estimated 1RM	avg. 1.6 t per workout	10.8 reps per set	Monday · 38×

VOLUME PER MUSCLE GROUP · 12 WEEKS

STRENGTH · ESTIMATED 1RM

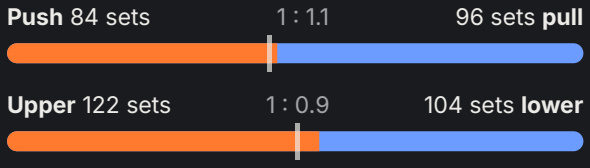

SETS PER MUSCLE GROUP PER WEEK

green = within the guideline of 6–12 sets

	wk 39	wk 40	wk 41	wk 42	wk 43	wk 44
Back	4	6	8	8	9	9
Quadriceps	3	5	6	7	7	8
Chest	2	3	4	5	6	6

BALANCE IN YOUR TRAINING

Nicely balanced. Otherwise you get a concrete tip.

Also: strength index per muscle group, muscle mass next to training volume, kilometres per week and steps against your goal.

ANALYSIS · WHEN DO YOU TRAIN?

mostly Thu 15–18

	6–9	9–12	12–15	15–18	18–21
Mon		2		4	
Tue	1			6	1
Wed		1		2	
Thu				7	
Fri			1	1	
Sat	2	4			
Sun	3	1			

Also on the Analysis tab: recovery (resting heart rate against load), calories next to weight and your records timeline.

AFTER EVERY WORKOUT

Your workout report, straight to your inbox.

As soon as your workout is in, GymCoach makes an overview as a PDF and emails it to you. Or open it in the app with one click.

GYMCOACH · WORKOUT SUMMARY — Demo

GC Full Body A

Thursday, 29 October 2026

DURATION	EXERCISES	SETS	VOLUME	CALORIES	HEART RATE
43 min	3	9	1,518 kg	260 kcal	133/163

MUSCLE GROUPS TRAINED

Including assisting muscles (counted as half).

▪ 9 sets below the target reps — the plan keeps the weight the same there

COMPARED WITH THE LAST 4 TIMES

Duration	43 min	avg. 44 min	-1%
Volume	1,518 kg	avg. 3,375 kg	-55%
Sets	9	avg. 9	0%
Calories	260 kcal	avg. 260 kcal	0%
Avg. heart rate	133 bpm	avg. 126 bpm	+6%

TIME UNDER TENSION

4:45 min — 11% of the workout

Under tension	4:45
Rest between sets	9:00
Switching, setting up	29:35

Avg. 2.9 s per rep

HEART RATE DURING THE WORKOUT

Source: Apple Health · zones relative to max. 172 bpm (set by you)

GymCoach · data from your Speediance Gym Monster — 1 / 2

WHAT'S IN IT

- **Key figures and muscle groups**
  Duration, sets, volume, calories and heart rate, plus the anatomical figure with the sets per muscle group.
- **Compared with previous times**
  Duration, volume, sets and heart rate against the average of the last 4 times you did the same workout.
- **Time under tension**
  How much of the workout you were really working, how much rest, and how long per rep.
- **Heart rate with zones**
  Your heart rate from the Apple Watch, with the minutes per zone (recovery to maximum).
- **Every exercise**
  Sets, reps, weight and records, compared directly with last time.

GymCoach
Your workout of 29 October: GC Full Body A

Well done! 43 min · 9 sets · 1,518 kg · 260 kcal · heart rate 133/163. The full report is attached.

TAILORED TO YOU

The same muscles. A plan that fits you.

Men and women build muscle mass and strength equally fast in relative terms. Where it does make a difference, GymCoach takes it into account; your own workouts weigh most.

Male
broader shoulders

Female
narrower waist, wider hips

Neutral
if you prefer

The figure follows your sex, or you choose yourself. Only the shape differs.

Rest between sets

Women usually recover faster between sets. Their rest is therefore 20% shorter, and the time saved goes to training.

Volume per workout

Women often tolerate a bit more work per workout. Focus exercises may go up to 5 sets, basic exercises get an extra set when time allows.

Maximum heart rate

For your zones. Women get a formula that fits better; your real maximum always takes precedence.

at age 60	formula	bpm
Male	`208 - 0.7 × age`	**166**
Female	`206 - 0.88 × age`	**153**

Your own recovery

Differences between people are larger than between men and women. If your reps drop in later sets, you get longer rest; if you always hit everything, slightly shorter.

Every calculation explained

In the app, under **Settings → About GymCoach → How GymCoach works** you can read how the plan is made, how every measurement works and which research it is based on.

TECHNOLOGY & INSTALLATION

Small, fast and entirely yours.

0
external packages
Pure Node.js, with a built-in SQLite database.

Local
on your own server
Runs as a background service on a Linux machine or mini PC at home.

Everywhere
in your browser
On PC, tablet and phone. Light or dark theme.

INSTALL IN THREE STEPS

1. **Get the app onto your server**

```
git clone https://github.com/stolding/gymcoach ~/gymcoach
```

2. **Start the installation (sets the app up as a background service)**

```
bash install.sh
```

3. **Open the dashboard: a wizard helps with account, machine and preferences**

```
http://<your-server-ip>:8765
```

What you need

- A Speediance Gym Monster with an account (tested on model 1)
- A Linux machine with Node.js (version 22.5 or newer)
- Optional: Withings, GymCoach Sync, email
- Optional: Claude API key or local language model
- Optional: VPS with your own domain, for use away from home

Privacy & multiple users

Your workouts, measurements and login details stay on your own machine. The AI coach is optional and can run fully locally. The whole household can join: everyone logs in with their own account, profile photo, plan and connections. In the app, *How GymCoach works* explains every calculation, with sources.
